# Invest in the High Court Challenge to the Gloucestershire Incinerator

**Want to invest in effective democracy and stop harmful incineration in Gloucestershire? Want to double your money at the same time?**

The Gloucestershire incinerator:

- Was contracted in secret in breach of procurement regulations
- Is hugely expensive - £M's more than existing landfill or alternatives
- Will prevent recycling and waste reduction
- Will produce 10K's tonnes p.a. of greenhouse gasses,
- Will emit trillions of toxic particles a second

Community R4C is challenging this contract in the High Court and we have formal legal opinion giving us a 50-70% chance of success. The next steps will be: recover £150M of illegal state aid for local taxpayers; ensure waste is recycled before incineration; and put in place sustainable methods for reducing and treating waste.

To help fund our court case, we are looking for a small number of five figure investors. We have already had several commitments but we need more.

If we win you can have 2X your money back, or reinvest in CommunityR4C Ltd or another project.

Investment options: *(note this is not a formal offer, please contact us to discuss)*

- Buy shares in Community R4C and get a 30% tax rebate (under EIS) (subject to HMRC clearance)
- Make a loan to Community R4C and get 2X your money back on success
- Combination of above

For more details or a 1:1 chat please email [admin@communityr4c.com](mailto:admin@communityr4c.com) or see our website [www.communityr4c.com](http://www.communityr4c.com)

Smaller investments also very welcome, please visit our crowdjustice page
